

Network Digital Signage Solution

Promote • Inform • Educate • Entertain

About CAYIN

Global Reliability

CAYIN is an industry-leading **digital signage** company that offers full services for various out-of-home venues such as transportation, education, retail, hospitality, corporations, and financial institutions. The uniqueness of CAYIN's solution lies in its feature-rich multimedia playback, powerful remote management, flexible integration capability, and great scalability, which provides you with broader combinations fitting various application requirements and budgets.

Smart Digital Signage Solutions

Flexible purchasing options

A choice between one-time investment hardware and subscribable software for self-hosted digital signage networks. Timely supports, flexible customization services, and free cloud resources are also available at the same time.

Ready-to-use Products

SMP players and CMS servers are bundled with industrial-grade hardware and advanced digital signage software. There is no need to worry about putting the hardware, OS, and software together; all you have to do is plug and use. Of course, there won't be any compatibility issues at all.

Open Integration Platforms

SMP players can retrieve data from cloud or other external systems such as social media, queuing management, factory and corporate management systems, hotel administration, sales and inventory systems, sports game systems, etc. Powerful SDK (software development kit) solutions also help you create your proprietary management tools via HTTP-based APIs and develop unique applications.

Scalable Applications

Industrial-grade quality digital signage appliances for various scales of applications with long-term stability.

- Networked Stand-Alone Solutions
- Multisite Centralized Management by Headquarters

Interactive and Personalized Applications

Intelligent Guide

Whether it's digital signage for info kiosk, transportation, or integration with smart devices, interactive solutions can quickly solve users' needs.

Multi-functional Service

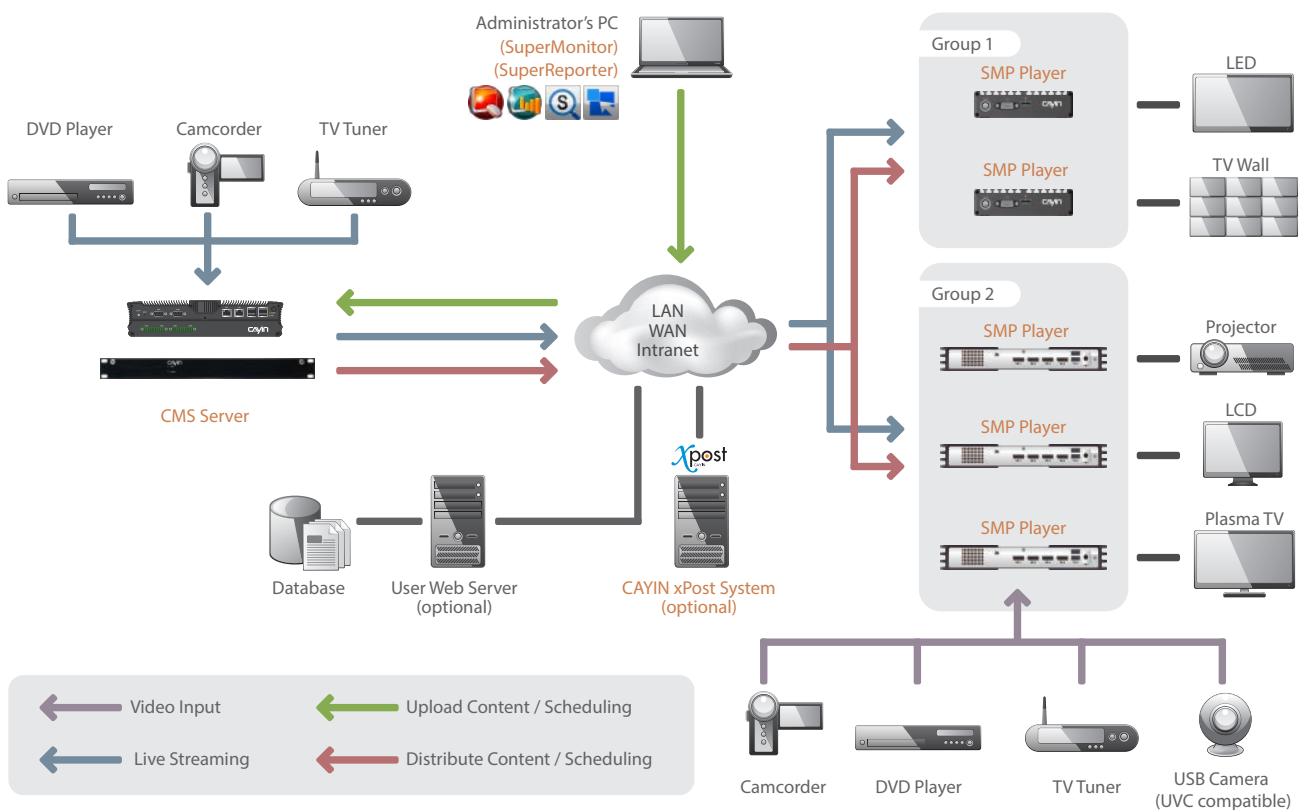

A multifunction digital signage helps you deliver targeted information and relevant services by integrating with scanners, sensors, web servers or databases for diverse vertical markets.

Cutting-edge Marketing

To connect and engage with customers by using media-rich messages, including HTML5 web page, Flash® animation, Twitter, weather, etc. You can further play real-time video or take advantage of location-based technologies to communicate with target audience at the specific time and place. Moreover, through the use of digital posters, all of us can contribute to saving the environment.

Under Various Scenarios

CAYIN Product Portfolio

Digital Signage Player
