Versatile Digital Signage Player for 4-Display Video Wall

SMP-8000/8000QD

Highlights

- Equipped with 4 DisplayPort outputs, tailored for 3 or 4-display video wall applications
- Support 4 signal output modes: single, clone, extended, and distinct modes
- 3 playback modes: zone-type, individual programs, or playlists
- Support 1080p Full HD video, Flash®, HTML5, weather, social media, etc.
- Offer flexible task scheduling based on once, daily, weekly, monthly, or yearly timescales
- Allow self-designed template creation either directly on SMP player or on your PC
- Make rich Library and cloud resources freely available
Ready-to-use Digital Signage Player
SMP-8000, the industrial-grade hardware, is bundled with dedicated digital signage software, SMP-NEO2, as a complete media player for digital sign applications. SMP-8000 and SMP-NEO2 are optimized to work well together. You can not only enjoy a seamless user experience, but also manage the device remotely from your web browser without installing any additional software.

Tailored for Video Wall and Multi-display Purposes
SMP-8000 supports four DisplayPort outputs, allowing extended mode such as 2x1, 1x2, 3x1, 1x3, 4x1, 1x4, or 2x2, that are suitable for video wall solutions. You can even define the screen resolution by yourselves. The screen rotation, including Landscape and Portrait, can also be implemented for simple multi-display setup. You will be able to execute flexible multimedia contents on your video walls by integrating SMP-8000 into your digital signage projects.

Four Signal Output Modes Widely Broadening Applications
SMP-8000 supports the following four signal output modes to provide more flexible combinations of presentations:

- **Single Mode**: connect to one screen
- **Clone Mode**: present identical contents on four screens
- **Extended Mode**: link two/three/four screens together and present content stretching across screens
- **Distinct Mode**: two sets of playback configurations on four screens
- **Distinct Mode**: present different contents on four screens

Built to Convey Instant and Media-rich Messages
SMP-8000 supports a variety of multimedia formats including 1080p Full HD video, Flash animation, HTML5 web page, image, music, and text ticker. The player can stream real-time HD video by connecting to a TV tuner, DVD player, or other multimedia devices through an external HDMI capture card (sold separately). The richness of your digital signage networks goes beyond promotional videos, other contents such as news, weather, social media, streaming videos and any partial web page can also be easily adopted to enrich your digital signage presentations.

Intelligent and Intuitive Scheduling Management
Playback schedules can be arranged in a variety of ways! You can insert a one-time event or arrange periodic tasks based on daily, weekly, monthly or yearly timescales. You can assign a date, a time period, or even a day in a specific week of a month (e.g. 2nd Sunday in May). Location-based scheduling is also doable to largely increase the flexibility.

SMP-8000 provides two viewing modes, calendar and timetable, for you to facilitate schedule management. In addition to editing a schedule directly on an individual SMP media player, you can also choose to centrally control multiple players in groups by a CMS server.
Versatile Digital Signage Player for 4-Display Video Wall

Easy-to-Use Template Creation in Two Ways
With SMP-NEO2, SMP-8000 provides a web-based Skin Editor so that users can perform a drag-and-drop operation to define the size and the location of each zone directly on SMP players. In addition, experienced web designers can also utilize any web-editing tool to create HTML pages with the greatest of flexibility.

Instant Remote Diagnostics and Preliminary Maintenance
Administrators can perform troubleshooting remotely by retrieving log records and monitoring key operational activities, such as system resource usage, CPU temperature, fan speed, and network topology. To obtain the optimal performance and functionality, users will be prompted to install patches when new software updates are available. If an abnormal situation occurs, SMP-8000 is equipped with a self-repair mechanism to restart the system automatically. Administrators can also restore configurations or recover a system immediately whenever it is necessary.

Flexible Platform for Extended Integration
SMP-8000 can be integrated with other external devices to meet requirements from diversified vertical markets. For instance:
- **Touch Screen:** easily extend to an interactive digital signage system incorporated with USB HID compliance touch screens.
- **RS-232:** turn on/off screens, adjust brightness, and control other devices, e.g. lamps or control panels.
- **Mobile Devices:** use mobile phones or tablets to change playlists.
- **Web Server & Database:** possess great flexibility to integrate with web servers (RSS, weather, Twitter, etc.) and databases, such as CAYIN xPost.

Powerful Player to Meet Versatile Media Demands
SMP-8000 supports three playback modes for all occasions and applications. You can choose to divide the screen into several zones, each of which applies different media with independent schedules and settings. Packing all zones into one program for a special season or holiday is also an option. If you simply want to deliver a full-screen presentation as a digital poster, you can edit playlists and take turns playing different multimedia contents.

Rich Library and Cloud Resources
All necessary raw materials, including multimedia files, fonts, clocks, skins, programs, and playlists, can be accessed easily in the Library to assist you in organizing resources. Moreover, the system allows you to upload your desired fonts or even to download the latest templates from CAYIN’s Cloud service for free to greatly enrich your content.
## System Specifications

| Zone type | • Able to use CAYIN Skin Editor to create templates either directly on SMP players or on your PC  
• Display zone (Single, Clone, & Extended modes):  
  • Video zone x 2 (video file/streaming/audio)  
  • HTML zone x 3  
  • Image zone x 2  
  • Ticker zone x 2  
  • Clock zone x 1  
  • Background image x 1  
• Number of zones can be multiplied in Distinct mode |
| Full-screen | • Use any web-editing tool to create HTML pages without limitations of zone numbers |
| **Multimedia Playback** | |
| Playback modes | • 3 options: Skin, Program, and Playlist |
| Web Pages | • Full-screen browser: embed Firefox V 45  
• Web language: support HTML 5⁽/one.superior⁾, JavaScript and CSS  
• Plug-in: Adobe® Flash® Player (V 11, Linux build), CAYIN Media Player (Video and Audio), CAYIN Ticker, CAYIN Image Slideshow  
• Content: show whole or part of HTML/Flash files, remote URL, weather, social media (e.g. Twitter) or integrate with users’ network facilities and databases |
| Streaming Video | • CAYIN RTB (MPEG4-TS, MPEG2-TS; bit rate: 1~5 Mbps)  
• RTP (MPEG TS; Codec: MPEG-2/MPEG-4)  
• HTTP/MMS |

⁽/one.superior⁾ The compatibility is based on built-in Firefox browser.
## Multimedia Playback

### Video Files
- Format: MPEG (MPG, VOB), AVI, WMV, WMA, MP3, MP4
- Codec: MPEG-1/2, MPEG-4 ISO, WMV 7/8/9, H.264
- Bit-rate: 15 Mbps (MPEG2, MPEG4, WMV, H.264), [Single mode/Landscape, 25 fps, single video playback]
- Resolution: up to 1080p (1920x1080)

### Audio Files
- Format: WMA, MP3
- Codec: MP3, WMA 7/8

### Image Files
- Format: JPEG/GIF/BMP
- Resolution: up to 1920x1080 (2 million pixels)

### Preview
- Playback simulator: image, HTML/Flash, remote URL, and ticker (Note: Simulation is for reference only. Actual display may differ.)

## Schedule

### Playback
- Local & central scheduling: edit schedules directly on an SMP player or centrally control multiple players in groups by a CMS server
- View type: calendar or time table
- Schedule mode: once, daily, weekly, monthly, yearly, and location
- Playback type: able to edit scheduled tasks for each zone or as a full-screen display

### Screen, volume & system
- Set schedules to turn on/off the screen, adjust SMP’s volume, or restart the system

## Content Update

### Methods
- Online (manually): FTP, Network Shares (Network Neighborhood), SMP’s Web Manager
- Online (automatically): CAYIN CMS server
- Offline: USB Storage Device

## System Settings

### Language
- User Interface: Chinese (Traditional), Chinese (Simplified), English, French, German, Italian, Japanese, Polish, Portuguese, Russian, Spanish, Thai
- Ticker Support: Unicode (UTF-8) compatible languages; able to use default fonts or upload TTF/OTF fonts (2).

(2) CAYIN doesn’t guarantee that SMP-NEO is compatible to all font files.
| System Settings | Display                                                                 | - Video Wall Array: 2x1, 1x2, 3x1, 1x3, 4x1, 1x4, 2x2 (in extended mode)  
- Screen resolutions: 640x480, 800x600, 1024x768, 1152x864, 1280x720 (720p), 1280x768, 1280x1024, 1360x768, 1366x768, 1600x900, 1600x1200, 1680x1050, 1920x1080, 1920x1200, 1920x1440  
- Single mode: support 4K UHD resolution and up to 4096 pixels for one side by User-defined mode  
- Clone/Extended/Distinct mode: support up to 2048 pixels for one side by User-defined mode  
- Portrait Mode: Support 90 and 270 degree display rotation  
- 4 signal output modes: Single, Clone, Extended, and Distinct modes  
- Support to detect EDID/DDC parameters  
- Support the screensaver function  
- Support to incorporate with USB HID compliance touch screen |
|                | Time                                                                 | - Set system time manually or synchronize the clock from an NTP server |
|                | Location                                                              | - Track SMP’s current location by GPS or simply show a static location in Google Maps |
| Remote Diagnostics and Maintenance | Hardware Monitor | - Check CPU temperature, fan speed, and utilization of CPU, system DRAM, and hard drive |
|                | Log                                                                  | - Create log files recording the system status  
- Able to purchase SuperReporter 2 to generate advanced playback reports |
|                | System Update                                                        | - Automatic notification of patch and firmware updates |
|                | Self-repair                                                          | - Able to restart/shutdown/recover the system and backup/restore configurations remotely. |
| Network        | Protocol                                                             | - Support static IP and dynamic IP (DHCP)  
- Support HTTP, SMB, ICMP, RTP MMS, SYSLOG, FTP |
| Resources      | Cloud-based                                                          | - Provide templates and materials in Library and Online Resources |
| Web Manager    | Recommended browsers                                                 | - IE 9 or later, Chrome 35 or later, Firefox 28 or later |
